ENGIE Regeneration

START - COMPLETION DATE

03/02/2020 - 01/05/2020

SECTOR

Leisure

FORM OF CONTRACT

PSPC Option 5

DELIVERY TYPE

Construct Only

KEYKPIs

ENGIE was selected to undertake various improvements to the Manchester Regional Athletics Arena, including replacement of the outdoor track, in preparation for hosting the 2020 British Championships and Olympic Trials.

The Manchester Regional Athletics Arena and National Squash Centre are located on Eithad Campus, and primarily comprises of an indoor 200m track and outdoor 400m track, squash facilities, changing facilities, a gym, and offices. The outdoor track was constructed in 2001 as a warm up track for the 2002 Commonwealth Games, and subsequently a 6,000 seater arena was built around the track. The facilities are extensively used by local community groups, and are home to various local athletics clubs and the regional headquarters for UK and England Athletics.

Scope of Works

The scope of works will include:

- Replacement of existing synthetic 400m outdoor track to International Association of Athletics Federations (IAAF) standards, inclusive of all line markings
- Modifications to existing 400m outdoor track to create additional lanes, and extension of track surface to cover adjacent areas
- Installation of loops into track for transponders / timing
- Drainage improvements to the outdoor track
- Installation of sand traps and covers to sand pits and installation of new take-off boards to long jump and triple jump
- Improvements to pole vault fixing points
- Improvements to steeplechase basin, including leak investigation and repair, installation of outdoor tap, connection into below ground drainage and provision of new barriers
- Replacement of Pole Vault and High Jump external beds.

The wider centre, including squash facilities and offices, will remain operational throughout the duration of the project.

At ENGIE we also want to impact and support the communities we work in and the people we work with, so as part of this scheme we will be providing apprenticeship and work placements opportunities, as well as continuing our work with schools and charities across Manchester.

Alyson Seddon, Head of Education & Public Buildings
