## Construction of a new five-bay fire station in Lymm plus an advanced training facility and Safety Centre covering 13,500 sqm

- The contractor is utilising elements of BIM 3D design and clash detection to aid the overall design of this project

## School Engagement and Student Development

- The contractor has established links with Mid Cheshire College and Warrington Collegiate, to offer site visits and work experience opportunities within its supply chain

## Sustainability and Localism

- A Supply Chain Open Day was held in Cheshire supported by Mid Cheshire College and Cheshire West and Chester Council and attended by over 100 local suppliers
- The local Jobcentre Plus (JCP) has been engaged in order to create a "pathway into work" for local unemployed people and links have been forged with the Prince's Trust to offer work placements
- Regular community briefings will be held to provide project updates to include question and answer sessions
- To promote the scheme, a groundbreaking event was organised with representatives of Cheshire Fire Authority and pupils from local schools

**“** This is an exciting development that will benefit this and future generations as we strive to achieve our vision of a Cheshire where there are no deaths, injuries or damage from fires and other emergencies. I am delighted, therefore that the Authority is able to invest in frontline response services.”

**Cllr John Joyce, Chair of Cheshire Fire Authority**
