JCT

DELIVERY TYPE

Design and Build

Design and construction of a single storey two bay Fire Station at Saughall Massie Road, Saughall Massie, Wirral, Merseyside.

Greenfield site Fire Station to include:

- 2 bay firestation and accommodation
- Collapsible Training Tower
- Sedum Roof / Timber cladding
- Full FF&E fit out

Prioritising local investment

- To maximise local spend, Wates held a 'Meet the Buyer' day, conducted with the Local Chamber of Commerce and Community partners
- Sub-contracting to local businesses does not always guarantee employment of local people, but these are the people who add strength to the local pound, spending more of their earnings in the local economy. As such, Wates have committed to a target of 90%+ of the workforce for the new Fire Station as being local
- Wates supply chain appointments were also encouraged to cascade these local labour targets as part of their contract

We aim to provide key social value commitments these include:

- Education Activities
- Work Placements
- Apprenticeships
- Training Weeks
- Community Activities
- Social Enterprise Engagement
- Employment Support
